- Bluetooth Low Energy Protocol
- Communication in 2.4Ghz ISM band
- Lithium Polymer Battery and charge circuit
- 1 x LED
- Ergonomic plastic subunit

Personnel Card

Employee's daily and weekly-monthly entry and exit times can be listed and a performance report can be created. Very efficient instant tracking location of the employee in the working site, where the employee should be and where not.

Inventory Sensor

The Inventory Tracking card performs the instant tracking of the live or non-living structure on which it is integrated with the electronic memory competence on it and keeps the waybill information, identity information and location information retrospectively.
